Experienced Frontend and React-native Developer: Simplifying complex business logic with Three years of expertise.

PROFESSIONAL EXPERIENCE

Kgcrm Solutions, Software Engineer

Technologies: React and Java

Feb 2024-Present

- Developed responsive web applications using React, Redux and Bootstrap ensuring high performance and scalability.
- Utilized third party libraries and collaborated closely with design and backend teams to implement user interfaces that meet functional requirement and design specifications.
- Developed scalable backend system with **JAVA**, resulting in a **32% in improvement in app**. Performance
- Implemented Swagger for API testing, which reduced integration time by 29% for external teams.
- Collaborated with cross-function teams to implement RESTFUL APIs and ensure seamless frontend system integration.

Fission Labs, Software Engineer Oct 2021-Dec 2023

- Hands on experience in Vanilla Js, React Js, React-Native, Redux, typescript, Hooks, HTML, Sass, CSS etc.
- Working together with the development team in the identification and translation of business and technical requirement.
- Helping team members, estimating and keep track of project status.

Project Coordinator

. Project Planning and Execution

- Coordinated with project managers to develop detailed project plans, including timelines, milestones, and resource allocation.
- Ensured all project activities were aligned with the strategic objectives and delivered within scope, time, and budget constraints.
- Managed project documentation, including requirements, specifications, and status reports, to ensure all stakeholders were informed.

Stakeholder Communication

- Acted as the primary point of contact between project teams, clients, and vendors, facilitating clear and consistent communication.
- Organized and led regular meetings with stakeholders to discuss project progress, address issues, and adjust plans as necessary.

Resource Management.

- Assisted in the allocation and management of project resources, ensuring optimal utilization to meet project demands.
- Monitored team performance and workload, providing support and resolving conflicts to maintain productivity and morale.

PROJECTS

KGCRM SOLUTIONS / <https://kgcrmsolutions.com>

- Created the website for zoho-bussiness-crm with latest technology like React, Style X implemented the Third parties like Slick slider, React-Router and formic etc.
- Developed and maintained integrations between Zoho CRM and third-party applications such as email marketing tools, accounting software, and payment gateways

VALET CLOSET / <https://valetcloset.com>

Valet Closet: Valet closet is an on-demand storage service based in US. It takes the headache out of storage and provide the customers with a dependable, affordable storage solutions. It is a quick and convenient way to store clutter that you may not necessarily want to get rid of.

- Contributed in developing web apps like Admin, Territory Manager, multi-family operator apps of this project.
- Contributed in developing mobile apps like Valet Closet Tenants App and Valet Closet driver app.
- Built Responsible for creating mobile apps screen using React-Native.
- Responsible for coding and designing of class and functional based components for UI in ReactJs.

- Responsible for integrating backend API using Redux state management.

EDUCATION

GURU NANAK DEV UNIVERSITY

Bachelors in technology, Major in Computer Science

Gurdaspur, PB

2017-2021

TECHNICAL SKILLS

Web Development

- **HTML5**: Structuring and presenting web content with semantic elements for SEO and accessibility.
- **CSS3**: Styling web pages with precision, including animations, Flexbox, and Grid layouts for responsive design.
- **SASS**: Writing maintainable and scalable CSS with variables, mixins, and nested syntax to modularize stylesheets.

JavaScript Frameworks and Libraries

- **JavaScript**: Developing interactive web applications with dynamic content updates, form validations, and event handling.
- **ReactJS**: Building single-page applications (SPAs) with reusable components and integrating state management with Redux.
- **React Native**: Creating mobile applications for iOS and Android, ensuring smooth user experiences across devices.
- **TypeScript**: Writing robust, type-safe JavaScript code, improving code quality and maintainability through strong typing and interfaces.

Backend Development

- **Java**: Programming backend services and applications, implementing design patterns and algorithms to solve complex problems.
- **Spring Boot**: Developing RESTful APIs and microservices, utilizing features for dependency injection, security, and data access.
- **NodeJS**: Building server-side applications and APIs, handling asynchronous operations, and implementing middleware for request handling.

State Management

- **Redux**: Managing application state in React applications, implementing Redux Thunk for handling asynchronous actions and side effects.

UI Frameworks

- **Bootstrap**: Designing responsive web pages using the grid system and pre-built components, customizing themes and styles to match project requirements.

Development Tools

- **Microsoft Visual Studio**: Coding, debugging, and deploying applications, enhancing productivity through IDE features and extensions.
- **Confluence**: Managing project documentation and collaborating with team members, creating and organizing knowledge bases, meeting notes, and project plans.
- **Jira**: Tracking project tasks, issues, and progress, managing sprints, user stories, and bugs in agile development environments.
- **Git**: Using version control for managing code repositories and collaborating with team members, performing branching, merging, and pull requests.
- **GitLab**: Leveraging repository hosting, CI/CD pipelines, and code reviews, automating testing and deployment processes using GitLab CI/CD.
- **Postman**: Testing APIs and validating responses, creating and executing test scripts for automation to ensure API reliability.
